- Stay updated with latest Technical News.
- Get to Know latest tool and technology.
- You can get better Job also.

FULL-STACK DEVELOPMENT

- Combination of Back-end + Front-end
- The developer has to make API
- The developer has to work on Database also
- The developer has to consume API also
- Some time develop design part.

What need to learn for Full Stack

- Need to Learn at least One backend and One front-end Technology
- Such as Angular + Node js or Vue Js + Laravel.
- One Database e.g MySQL, Mongo
- Tool such as swagger and postman etc

Backend vs Frontend vs FullStack

- In Backend we make API and connect with database
- In Front-end we use API and connect with UI
- Full stack developer do both things

Back-End   Front-End

API

DB

Jobs in Full-stack development

- 20 % of jobs are available for full-stack.

- But they can work as back-end.
  developer or front -end developer also.

- Full-stack developer need to do really hard work.

Salary in Full-Stack Development

- **Actually the Full Stack doesn't have a specific salary.**
- Salary Depend on
  - Technology.
  - Experience.
  - Company.
